

Kanban Board Project Week 28 Deliverables

Objective:

Develop and integrate two new features on the frontend, with backend support for APIs and database integration. The UI/UX team will initiate the mobile template. Ensure all code is pushed to GitHub, documentation is updated, and time is tracked in Clockify. Additionally, provide a two-week prior intimation about the upcoming **demo on March 14, 2025**, and begin preparations.

Backend Team Deliverables:

March 3, 2025: Feature Development Kickoff

- **API & Database Planning:** Finalize API and database schema updates required to support the two new front-end features.
- **Team Sync:** Discuss integration points with the frontend team and define expected API responses.
- **Sprint Planning:** Outline backend development tasks and assign responsibilities.

March 4, 2025: API and Database Development

- **API Implementation:** Develop APIs needed for frontend integration.
- **Database Updates:** Apply necessary modifications to the database.
- **Daily Standup:** Provide updates on progress and resolve blockers.

March 5, 2025: API Testing and Refinements

- **Testing:** Conduct initial tests on APIs, ensuring correct data flow.
- **Integration Support:** Work closely with the frontend team to assist in API consumption.
- **Bug Fixing:** Address any issues found during testing.

March 6, 2025: GitHub Push and Documentation Update

- **Push Code to GitHub:** Ensure all backend changes are committed and pushed.
- **Update Documentation:** Include API specifications and database changes.

March 7, 2025: Final Testing and Demo Prep

- **Final API Validation:** Ensure all endpoints work correctly with frontend components.

- **Demo Preparation:** Start compiling necessary materials for the March 14 demo.
-

Frontend Team Deliverables:

March 3, 2025: Feature Implementation Kickoff

- **Feature Planning:** Define frontend implementation strategy for the two new features.
- **Component Setup:** Start working on UI components for the new features.
- **Backend Sync:** Discuss API endpoints and expected responses.

March 4, 2025: Feature Development Progress

- **Feature Integration:** Start integrating backend APIs into the frontend.
- **UI Refinements:** Work on improving user interactions and design consistency.
- **Testing Begins:** Conduct initial checks on feature functionality.

March 5, 2025: Testing and Debugging

- **Integration Testing:** Test API consumption and data rendering on the frontend.
- **Bug Fixing:** Resolve any issues encountered during integration.
- **Daily Standup:** Provide status updates and raise any blockers.

March 6, 2025: GitHub Sync and Documentation

- **Code Push to GitHub:** Ensure all feature updates are committed.
- **Documentation Update:** Include details about the new features, UI changes, and API integrations.

March 7, 2025: Final Testing and Demo Prep

- **Final Testing:** Conduct thorough UI and functional tests.
 - **Demo Preparation:** Begin preparing slides, demos, and talking points for the March 14 showcase.
-

UI/UX Team Deliverables:

March 3, 2025: Mobile Template Kickoff

- **Template Planning:** Define the structure and key design components for the mobile template.
- **Initial Wireframing:** Start designing wireframes for the mobile UI.

March 4, 2025: Refinement and Internal Review

- **Prototype Development:** Create interactive prototypes for testing.
- **Team Feedback:** Gather feedback from developers and stakeholders.

March 5, 2025: Final Adjustments and Handoff

- **Final Adjustments:** Incorporate feedback into the mobile template design.
- **Design Handoff:** Provide finalized designs to the development team.

March 6, 2025: Documentation and GitHub

- **Update Documentation:** Add details on mobile design guidelines and key UI decisions.
- **Push Files to GitHub:** Ensure all UI assets and templates are available in the repository.

March 7, 2025: Demo Preparation

- **Demo Support:** Prepare visual materials for the March 14 demo.
- **Design Review:** Ensure all UI components align with project goals.

General Team Deliverables:

- **Clockify Tracking:** All team members must update their work hours throughout the week.
- **Demo Announcement: March 14, 2025**
- **Code & Documentation Updates:** Ensure all work is pushed to **GitHub** and properly documented.
